Tips/Gratuity		●			●		●

(1) On-Board Backup is the ability of the time clock to store punches in the event of a power failure. Time clocks use non-volatile flash memory to store punch data.

(2) Battery Backup Accessory will allow the clock to function normally for a period of time in the event of a power outage.

(3) Either Bell Relay or Door/Buzzer Relay may be selected on the Velocity 800 and Velocity 850 models.

(4) With OnDemand

(5) Unlimited with OnDemand. Offline fingerprint template storage: NXG = 5000. V800, V850, Rugged V800, Rugged V850 = 1400

(6) Device will have a battery. However, peripherals will not work off battery alone. UPS is recommended as a backup battery.

Transforming employee experience for a better today and a better tomorrow.
